

DJs

Joost van Bellen

Now here is somebody who's been busy from the early days of house. Ever since he has started out as a DJ back in the mid eighties, Joost van Bellen has been innovating the Dutch music scene. Roxy, the Amsterdam Love Ball, Fashion Shows. Just to name a few things that he has done. Most people today know him from the highly praised 'Speedfreaks'. Doesn't matter if you call it Two Step, UK-Garage or US-Garage... Joost van Bellen is your man.

CJ Bolland

With future chapters to be still written it's a sure thing that CJ Bolland has already finished a few. For being a producer/DJ for almost 12 years, CJ has linked himself with originality and passion which resulted in dozens of releases under his own name and even more under different aliases. (Pulse, Space Opera, Sonic Solution, the Prophet) Quality Techno, that is what CJ Bolland stands for!

Ron Carroll

DJ/Vocalist Ron Carroll has been an established name in underground garage for years already. It's only recently that people got to know him with his big hit Superstar. For many of you he will be one of the big surprises on this year's festival.

Erick E

What on heaven's earth do we need to talk about Erick E? That he's been an important factor in the Dutch house industry for over a decade or the fact that he has played at almost every Dutch club or festival. Or is it just his ability to play every kind of music that made him so popular with promoters and the audience. We won't bore you with any more facts about Erick's career. Just enjoy Holland's nr.1 DJ!

Lucien Foort

From the time of Quadrophonia back in the late eighties up till now, Lucien Foort has proven to be a constant factor in producing quality house music. This year he's on a roll and nothing can stop this man. With awesome releases under different names (Funk Funktion,

Dutch Liquid) and a double album, called 'Singularity' he's decided to use his real name and so far with great success. If there is one man that can overwhelm you with his enthusiastic set, it must be Lucien Foort.

Terry Francis

Co- Owner of Bacon rec., Resident DJ of 'The Fabric', London, promoter of the very popular monthly underground top night 'Wiggle' and creator of the wonderful compilation series 'Architecture' part 1 and 2. A tech-house purist, in every possible way and a great DJ, so don't miss out on this opportunity.

Funky and Don Londi

For those who attend Extrema's regular parties in Maastricht and Eindhoven know what to expect from these two residents. For this year's occasion they have decided to team up and bring you the best they have got, which is groovy deep house and club music with a true underground spirit.

GoGo

Maybe not very well known to the most of us, but this man has been on the block for some years now. With releases under his own name for Cyber Rec. and Hooj Choons he surprised everybody. As one of the top dj's for Zurich's Love Parade he has been shaking the streets for years and he has played a lot of clubs all around the world. Expect a tough set of deep house with lot of tribal and trance influences from this top DJ/producer from Zurich.

Danny Howells

Tribal Progressive with very chunky bass lines, that makes you wanna move your feet. If there would be another way to describe his music, we would but there isn't. With a weekly residency at John Digweed's Bedrock, a new album for Jbal Underground, Ace productions under the name of Science Dept. and his own compilation series 'Nocturnal Frequencies', there is no other conclusion that Danny is firmly working his way to the top.

Johan

Been there, done that must be the phrase for Johan Groenewegen. The man behind the famous Gaultier and No-One parties back in the mid Nineties. Founder and owner of Cyber Records and shop and somebody with a great taste for good music. Last years has been very quiet for Johan as a DJ in Holland because of gigs all around the globe but today it's time to enjoy the melancholy style of Johan.

Sander Kleinenberg

If there is one man who has drawn an awful lot of attention to himself this year it is Sander. With his brilliant 'Four Seasons E.P.' he has caught the attention of almost every DJ and record company around. Sander has made name for himself with his tailor made productions and his highly respected progressive DJ sets. With a new residency at England's hottest club 'Gatecrasher' and a new album on its way, things can hardly go wrong for him.

Laidback Luke

Not many will realize that Luke van Schappingen is only 23 years of age. Listening to his music is like an old Chicago soul kept in a dutch body. His big break came with a remix of Green Velvet's 'the Stalker', but before that he had already composed his all time classic 'Act the Fool'. Watch this guy scratching and cutting up records and have the time of your life!

Q-Lock

Friends call him a white Carl Cox. Fact is indeed that those same friends never hear any mistakes in his mixing. With over 14 years of experience in mixing and 8 years of producing it's time for David Zoetmulder to get out there and make some serious noise.

Allison Marks

England's fastest rising star is making her festival debut at Extrema. Thing's have become very hectic for Allison since she's won the 'Music Bedroom dj Contest'. Since then she has played at clubs all around Europe. Make sure that your around to hear the unique sexy and groovy sound of Allison Marks.

Montana

Weekdays is record selling time at Tiesto's record shop Magik in Breda.

Weekends... well that's a different story for DJ Montana. If there is one promising DJ out there at the moment it must be him. Making name for himself as Tech-house producer/DJ, he is also getting much appreciation for his "Space Age" cd's on Black Hole. For DJ Montana it is just a matter of time before everybody knows about his energetic style.

Roog ft. Rose

DJ Roog and vocalist Rose almost need no further introduction. They have successfully been playing at all big clubs and parties around Holland, such as Dance Valley, SOAP and Innercity. Rose is currently recording her solo album with the very respected producer King Britt (usa). DJ Roog just started his own label called 'Hardsoul Pressings'.

Steve Rachmad

Why is it that so many producers use so many names? It would be a lot easier if every record that Steve makes, would have his name on it.

People by now know what to expect from this sympathetic Dutch man. Detroit techno with the Steve Rachmad groove.

Dave Seaman

It almost seems like everything turns to gold what Mr. Seaman touches. Member of Brothers in Rhythm, co-founder and owner of Stress Records, a million dollar ear insurance, a monthly residency at New York's super-club 'Twila' and of course his weekly residencies for Renaissance. This will be his second appearance in 3 years in Holland, so don't miss out on this rare opportunity to enjoy the long and deep mixing of Dave Seaman.

Trish & Kash

If there is one thing that people do appreciate in Belgium, it is Techno. And if we mention Techno, we talk about world famous club 'the Fuse', loved by DJ's and Audience. Those who've ever been at the Fuse know what to expect from their resident DJ's Trish and Kash. Great funky techno with a belgium twist.
